

# Reptile Rules

**R**eptiles—turtles, lizards, and snakes—carry *Salmonella* bacteria. The bacteria is shed in the reptiles' poop and gets on the reptiles' skin, their cages, and other things they touch.

You can pick up the bacteria on your hands and spread it to other people. *Salmonella* causes illness similar to food poisoning with serious stomach and intestinal distress, diarrhea and vomiting.

Young children are at higher risk of catching *Salmonella* and suffering severe problems due to infection. This is also true for the elderly and those with weakened immune systems.

How can you prevent the spread of *Salmonella*? Keep handling of your pet reptile to a minimum. Always wash your hands with soap and warm water immediately after touching it.

**E**njoy your pet reptile, and protect your family from *Salmonella* infection. Be safe.  
Play by the rules!

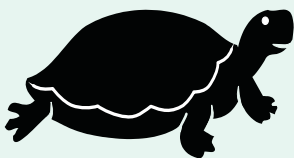

To learn about diseases related to pets or salmonellosis visit CDC's website at [www.cdc.gov/ncidod/diseases/pets/diseases.htm](http://www.cdc.gov/ncidod/diseases/pets/diseases.htm)

# Reptile Rules

**Keep** reptiles out of homes and child care settings with children under 5 or people with weakened immune systems.

**Wash** your hands thoroughly after you handle your pet reptile, its food or anything it has touched.

**Enjoy** your pet reptile, but don't nuzzle or kiss it.

**Cage** your pet reptile in a habitat designed for it; don't let it roam around the home.

**Keep** your pet reptile and its equipment out of the kitchen or any area where food is prepared.

## Questions?

Contact your Local Health Department with questions or for more information.

**Dear Colleague,**

The Washington State Department of Health (DOH) is pleased to provide camera-ready art for printing this educational material. To ensure that the original quality of the piece is maintained, please read and follow the instructions below and the specifications included for professional printing.

- **Use the latest version.** DOH materials are developed using the most current information available, are checked for clinical accuracy, and are field tested with the intended audience to ensure they are clear and readable. DOH programs make periodic revisions to educational materials, so please check this web site to be sure you have the latest version. DOH assumes no responsibility for the use of this material or for any errors or omissions.
- **Do not alter.** We are providing this artwork with the understanding that it will be printed without alterations and copies will be free to the public. Do not edit the text or use illustrations or photographs for other purposes without first contacting us. Please do not alter or remove the DOH logo, publication number or revision date. If you want to use a part of this publication for other purposes, contact the Office of Health Promotion first.
- **For quality reproduction:** Low resolution PDF files are intended for black and white or color desktop printers. They work best if you are making only one or two copies. High resolution PDF files are intended for reproducing large quantities and are set up for use by professional offset print shops. The high resolution files also include detailed printing specifications. Please match them as closely as possible and insist on the best possible quality for all reproductions.

If you have questions, contact:
